IN PERSON. PLEASE CONTACT DARRYL JASKOW AT 780-735-0863

DR. NILS BERGMAN

Dr Bergman graduated at the University of Cape Town, and has worked in South Africa, Ciskei and, Sweden, before working seven years as Medical Superintendent and District Medical Officer at Manama Mission, Zimbabwe. Here he, together with Midwife Agneta Jurisoo, developed and implemented Kangaroo Mother Care (KMC) for premature infants right from birth. This resulted in a five-fold improvement in survival of Very Low Birth Weight babies.

He introduced KMC to South Africa in 1995, and after 5 years, KMC became official policy for care of prematures in the hospitals of the Western Cape province. He has given keynote addresses on KMC at International Conferences in six continents, and published articles on a variety of subjects in medical journals. He continues to research and promote KMC.

He was for 6 years Senior Medical Superintendent of the Mowbray Maternity Hospital (7000 deliveries per year) and five Midwife Obstetric Units (11000 deliveries per year). Dr Bergman continues to live and work in Cape Town, as a Consulting Public Health Physician. He is also an honorary senior lecturer and research affiliate with the University of Cape Town. Apart from his original degree, he holds a Diploma in Child Health, a Masters degree in Public Health, and a Doctoral degree in Clinical Pharmacology, on the effects of scorpion stings.

He is married to Jill, and father to Rebecka, Simon and Emma.

CONFERENCE OBJECTIVES

- Describe the history of neonatal care and its scientific basis.
- Define Kangaroo Mother Care, both in terms of basic biological needs and its three components.
- Describe the biological basis of breastfeeding.
- Describe state organization and state the effects of separation on state organization.
- Describe ways to assist a premature infant to breastfeed successfully.
- Describe the normal physiology of feeding and sleep cycling.
